RE: Demolition of 4640 Lake Drive

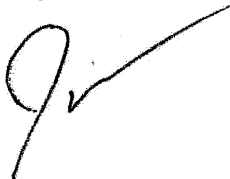

Dear Neighbors,

Most of you already know that, after a long series of meetings and appeals, we received final approval to demolish the structure at 4640 Lake Drive. This process has been going on for 2 months, and the final phase of the demolition will be occurring later this month.

Many of you have seen the trucks and cars of the Habitat for Humanity workers who were hard at work this summer, salvaging wood, window frames, doors, flooring etc. After this was complete, the second part of the demolition took place. The environmental engineers spent several weeks removing materials from the house to prep it for the structural demolition.

And now, this month, we will be completing the final phase of the demolition. We understand that the trucks in this final phase will be larger, but also be in and out more quickly than the previous phases. As a courtesy, Brooke and I are notifying neighbors that this process should be taking place shortly.

Thank you

John Brodersen
